

# Touch Secure – Pair Smart Lock to Google Home

## 1. Device Setup

- Ensure Touch Secure app is paired with gateway and can be operated through Wi-Fi.
- Download Google Home app and set up the device before start.
- Ensure the lock is at the locked state before start.

## 2. Add Touch Secure Lock on the Google Home

- Tap the *Add* button on the bottom and select *Works with Google Home*.

- b. Search KFM Plus and find the icon shown as below.  
\*the Touch Secure app and icon will replace KFM Plus in Q1, 2025\*

- c. Enter your KFM account name and password to login and *Choose device* to complete connection. Google Home will connect the device automatically.

- d. When the lock is added to the devices, it will appear on top of the list.
